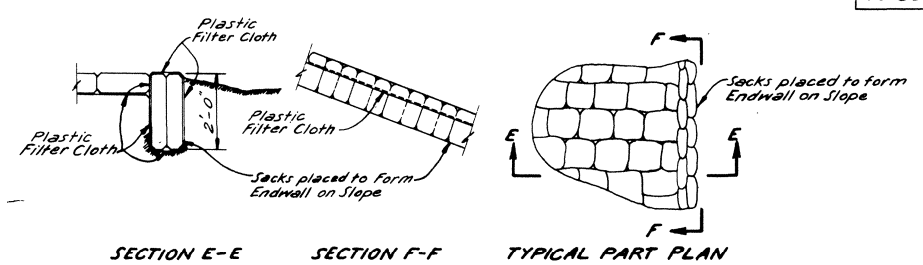
GENERAL NOTES:

When Item 712(5) Flexible Revetment is Specified in the Plans, the Contractor will be Permitted to use Sacked Concrete Revetment over Filter Cloth or Cellular Concrete Blocks over Filter Cloth or Stone over Filter Cloth in Accordance with Details Shown on this Sheet.

Concrete Blocks, as Detailed on this Sheet, were Developed by Gobimat Erco System, Inc., of New Orleans, La., However, the Contractor will be Permitted to Submit Alternate Designs for the Cellular Concrete Blocks, Meeting all the Requirements of the Supplemental Specs. to the Bridge Design Engineer for Approval.



SECTION E-E SECTION F-F TYPICAL PART PLAN

ENDWALL DETAILS FOR SACKED REVETMENT

NOTE TO CONTRACTOR:
ALL AREAS OF BERM SLOPE, SIDE SLOPES & SPUR DIKES NOT REVETTED ARE TO BE TREATED AS SHOWN ON GENERAL PLAN.

Fill For Spur Dike To Be Paid For Under Item 203(4) "Embankment", Per Cu. Yd., Unless Otherwise Specified. Broken Concrete Will Not Be Permitted Except As Shown In Detail "A".

See General Plan for limits of Revetment Required Under Bridge.
