LOUISIANA DEPARTMENT OF
TRANSPORTATION & DEVELOPMENT

DOTD Secretary Shawn Wilson Announces Additions To Executive Team

Louisiana Department of Transportation and Development Secretary Shawn Wilson, Ph.D. announced today the addition of four members to his executive staff. Myles Brumfield was named Confidential Assistant to the Secretary, Chance McNeely was named the Assistant to the Secretary for Policy, Brigadier General Barry Keeling was named Undersecretary and Joshua Hollins was named Legislative Liaison.

Brumfield joins DOTD after serving as Special Assistant to Governor John Bel Edwards during the runoff election and throughout the transition to the Governor's Office. A native of Slidell, he graduated from Louisiana State University with a degree in mass communication.

McNeely began his career as a congressional staffer in Washington, D.C., where he developed an expertise in transportation, agriculture, environmental issues and energy policy. He later served as a policy advisor in the Governor's Office where he was the liaison to DOTD and several other state agencies. He most recently served as an assistant secretary at the Louisiana Department of Environmental Quality.

Keeling comes to DOTD after serving as the Director of the Joint Staff for the Louisiana National Guard since 2011. He was responsible for directing, supervising, training, and coordinating the Joint Staff and assisting the adjutant general in the deployment and coordination of programs, policies, and plans affecting more than 11,000 citizen soldiers and airmen.

Hollins served as the Community and Legislative Liaison at the Office of the Louisiana Attorney General since 2013. He brings an expertise in working with state and local government and public outreach experience to DOTD. In addition, he worked for the Louisiana House of Representatives from 2009 to 2013.

"We have a lot to accomplish as we work to improve the Louisiana's infrastructure," Wilson said. "Each member of the team brings unique experiences and talents. Myles, Chance, Barry and Joshua are well-suited for their roles and will be valuable assets to our team as we address our state's transportation needs."

OSHA Safety Article.....

Medical and First Aid

It is a requirement of OSHA that employees be given a safe and healthy workplace that is reasonably free of occupational hazards. However, it is unrealistic to expect accidents not to happen. Therefore, employers are required to provide medical and first aid personnel and supplies commensurate with the hazards of the workplace. The OSHA First Aid Standard (29 CFR 1910.151) requires trained first aid providers at all workplace of any size. If there is no infirmary, clinic, or hospital in near proximity to the workplace which is used for the treatment of all injured employees.

What is First Aid?

First aid refers to medical attention that is usually administered immediately after the injury occurs and at the location where it occurred. It often consists of a one-time, short-term treatment and requires little technology or training to administer. First aid can include cleaning minor cuts, scrapes, or scratches; treating a minor burn; applying bandages and dressings; the use of non-prescription medicine; draining blisters; removing debris from the eyes; massage; and drinking fluids to relieve heat stress.

Employers Responsibilities

Provide First Aid Supplies and Equipment

In order to administer effective first aid, it is important to maintain adequate supplies in each first aid kit. It is advisable for the employer to give a specific person the responsibility for choosing the types and amounts of first aid supplies and for maintaining these supplies. The supplies must be adequate, should reflect the kinds of injuries that occur, and must be stored in an area where they are readily available for emergency access. An automated external defibrillator (AED) should be considered when selecting first-aid supplies and equipment. First aid kits can be purchased commercially already stocked with the necessary supplies, or one can be made by including the following items:

- Adhesive bandages: available in a large range of sizes for minor cuts, abrasions and puncture wounds
- Butterfly closures: these hold wound edges firmly together.
- Rolled gauze: these allow freedom of movement and are recommended for securing the dressing and/or pads. These are especially good for hard-to-bandage wounds.
- Nonstick Sterile Pads: these are soft, super absorbent pads that provide a good environment for wound healing. These are recommended for bleeding and draining wounds, burns, infections.
- First Aid Tapes: Various types of tapes should be included in each kit. These include adhesive, which is waterproof and extra strong for times when rigid strapping is needed; clear, which stretches with the body's movement, good for visible wounds; cloth, recommended for most first aid taping needs, including taping heavy dressings (less irritating than adhesive); and paper, which is recommended for sensitive skin and is used for light and frequently changed dressings.
- Items that also can be included in each kit are tweezers, first aid cream, thermometer, an analgesic or equivalent, and an ice pack.

More Importantly Employers Should.....

- Identify and assess the workplace risks that have potential to cause worker injury or illness.
- Design and implement a workplace first aid program.
- Assign and train first aid providers.
- Instruct all workers about the first aid program, including what workers should do if a coworker is injured or ill. Putting the policies and program in writing is recommended to implement this and other program elements.
- Provide for scheduled evaluation and changing of the first aid program to keep the program current and applicable to emerging risks in the workplace, including regular assessment of the adequacy of the first-aid training course.

OSHA Safety Article.....

Employees Should.....

GET MEDICAL ATTENTION FOR ALL INJURIES

It is very important for you to get immediate treatment for every injury, regardless how small you may think it is. Many cases have been reported where a small unimportant injury, such as a splinter wound or a puncture wound, quickly led to an infection, threatening the health and limb of the employee. Even the smallest scratch is large enough for dangerous germs to enter, and in large bruises or deep cuts, germs come in by the millions. Immediate examination and treatment is necessary for every injury.

REPORT ALL INJURIES TO YOUR SUPERVISOR

As with getting medical attention for all injuries, it is equally important that you report all injuries to your supervisor. It is critical that the employer check into the causes of every job-related injury, regardless how minor, to find out exactly how it happened. There may be unsafe procedures or unsafe equipment that should be corrected.

This article was compiled from the OSHA website. Our intent is to provide general information that may be of assistance to employers in protecting their employees from injuries. For more information about this topic and other safety related topics, please visit www.osha.gov.

First aid is important because it can help save lives. So, please share this information with your employees.

EVENTS & WORKSHOPS

LOUISIANA SMALL BUSINESS DEVELOPMENT CENTERS

On Demand

Five Steps to Secure Financing

On Demand, available until February 29

Topic: Financing and Capital

In this self-paced training video, you will learn the five key steps to financing your small business. DBE PROFILE

Our team brings extensive expertise in all facets of the transit equity industry, from impacted communities of a transportation agency, to equity analysis, community outreach, and federal regulatory compliance. This specific combination of experience has allowed us to make an historical impact for Transit Equity in Civil Rights.

Our accomplishments include taking the lead on developing and implementing the new Title VI and EJ language that was approved and sent to transit agencies from the U.S. Department of Transportation. Our founder’s groundbreaking visionary guidelines helped shape the approach that transit agencies are using to meet federal civil rights compliance and address EJ issues.

Amber Ontiveros’ notable work includes being the lead investigator for a fare equity analysis case with the Metropolitan Transportation Commission, San Francisco, CA; the lead investigator for the BART Oakland Airport Connector and the Los Angeles County Metropolitan Transit Agency, Los Angeles, CA Title VI cases. Ms. Ontiveros’ extensive experience in reviewing, investigating, training, and coaching transportation agencies throughout the United States makes her the ideal person to work with consultants and federal recipients on Title VI and EJ issues.

Ontiveros & Associates is joined by their joint venture analytics partner, the Philadelphia-based economics consulting firm Econsult Solutions, Inc., as well as nationally recognized equity and environmental justice experts Dr. Samuel Myers of the University of Minnesota’s Roy Wilkins Center for Human Rights, Marc Brenman, and Dr. Tom Sanchez, Director of Planning and Urban Studies at Virginia Tech in providing outstanding equity, qualitative and quantitative services. All are nationally recognized experts who have made substantial contributions to environmental justice and discrimination policy around the nation.

SERVICES

- Service and fare equity analysis
- Public affairs and crisis management
- Discriminatory impact analysis and development of equity indicators
- Outreach to diverse constituents
- Programmatic formulation
- Geographic information systems (GIS), demographic, economic and statistical analysis
- Housing and transportation affordability analysis
- Limited English proficient (LEP) analysis
- Complaint investigations and preventative measures
- Public policy development

TRAININGS

- Title VI of the Civil Rights Act of 1964 and transit: the application of 49CFR Part 21
- Environmental justice: an overview
- Title VI or environmental justice?
- The place and role of outreach: best practices
- Data collection best practices in understanding and developing equity indicators
- Equitable transit-oriented development (TOD)
- State of Good Repair (SGR) investments and equity
- Title VI and/or environmental justice complaints
- Title VI and the implementation of the Federal US DOT DBE Program

What can SJB Group do for You?

SJB Group, LLC can provide **free assistance** to certified LADOT DBE firms in the following areas:

SJB Group can assist you by: preparing company business cards, profile sheets, and providing information on recommended target areas for your marketing efforts.

By acting as a liaison between the DBE Contractor and Prime Contractor for project information, and in problems occurring on the jobsite.

By informing of upcoming LADOT lettings, and project information for other agencies throughout the state. SJB can assist you in locating bid tabulation information as well.

By providing assistance and guidance on material takeoffs, bid preparation and estimating, project scheduling, and planning for projects that DBE firms are bidding or plan to bid in the near future.

By helping with office computer operations to include trouble-shooting problems, Internet access and software installation, and basic to technical computer training.

By assisting in financial areas such as loan and bond package preparations, company financial statements, business plan preparation, and SBA 8(a) and Hub-Zone certification packages.
