

# IDIQ CONTRACT FOR PROFESSIONAL BOUNDARY SURVEYING SERVICES

WITH MAJORITY OF WORK IN DISTRICTS 02, 61 AND 62

OCTOBER 12, 2023

CONTRACT NO. 4400027919

Submitted to:  
Louisiana Department of Transportation  
and Development (DOTD)

Submitted by:  
Forte and Tablada, Inc.

# SECTIONS 1-11

# DOTD FORM: 24-102

(Revised January 1, 2023)

## PROPOSAL TO PROVIDE CONSULTANT SERVICES

1. Contract title as shown in the advertisement	IDIQ Contract for Professional Boundary Surveying Services Districts 02, 61, and 62
2. Contract number(s) as shown in the advertisement	Contract No. 4400027919
3. State Project Number(s), if shown in the advertisement	N/A
4. Prime consultant name (name must match as registered with the Louisiana Secretary of State where such registration is required by law)	Forte and Tablada, Inc.
5. Prime consultant license number (as registered with the Louisiana Professional Engineering and Land Surveying Board (LAPELS) if registration is required under Louisiana law)	EF.0000330 - Engineering VF.0000055 - Surveying
6. Prime consultant mailing address	Forte and Tablada, Inc. 9107 Interline Avenue Baton Rouge, LA 70809
7. Prime consultant physical address (existing or to be established, if location is used as an evaluation criteria)	Forte and Tablada, Inc. 9107 Interline Avenue Baton Rouge, LA 70809
8. Name, title, phone number, and email address of prime consultant's contract point of contact	Brad Holleman, P.L.S., P.E. Senior Vice President - Survey/Advanced Measurements and Modeling 225-927-9321 bholleman@forteandtablada.com
9. Name, title, phone number, and email address of the official with signing authority for this proposal	Russell J. "Joey" Coco, Jr. - President/CEO (225) 927-9321 jcoco@forteandtablada.com

10. This is to certify that all information contained herein is accurate and true, and that the team presently has sufficient staff to perform these services within the designated time frame. By submitting this proposal, proposer certifies that it is not engaged in a boycott of Israel and it will, for the duration of its contract obligations, refrain from a boycott of Israel. Proposer also certifies and agrees that the following information is correct: In preparing its response, the proposer has considered all proposals submitted from qualified, potential subcontractors and suppliers, and has not, in the solicitation, selection, or commercial treatment of any subcontractor or supplier, refused to transact or terminated business activities, or taken other actions intended to limit commercial relations, with a person or entity that is engaging in commercial transactions in Israel or Israeli-controlled territories, with the specific intent to accomplish a boycott or divestment of Israel. The proposer also has not retaliated against any person or other entity for reporting such refusal, termination, or commercially limiting actions. DOTD reserves the right to reject the response of the bidder or proposer if this certification is subsequently determined to be false, and to terminate any contract awarded based on such a false response.

Signature above shall be the same person listed in Section 9:

-----  
Date: 10/10/2023

11. If a Disadvantaged Business Enterprise (DBE) goal has been set for this advertisement, indicate which firm(s) will be used to meet the DBE goal and each firm(s)' percentage.

Firm(s):

Firm(s)' %:

No DBE Goal

# SECTIONS 12-16

**12. Past Performance Evaluation Discipline Table:**

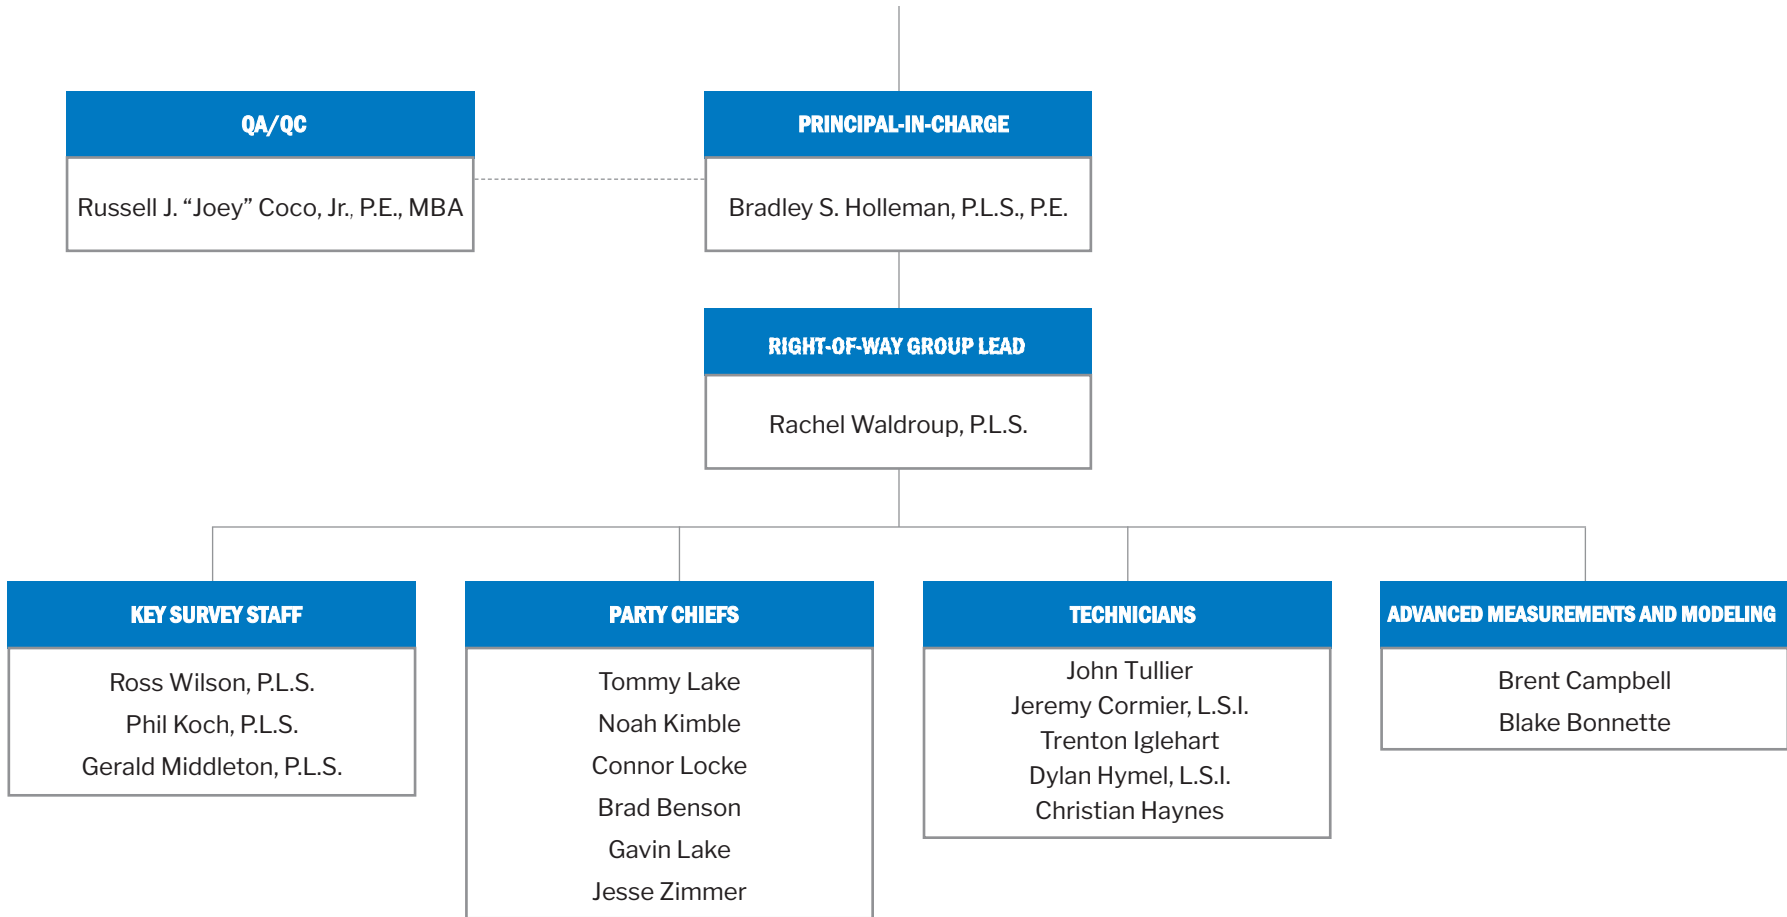

As indicated in the advertisement, insert the completed table here. The percentages for the prime and sub-consultants must total 100% for **each past performance evaluation discipline**, as well as the overall total percent of the contract.

Past Performance Evaluation Discipline(s)	% of Overall Contract
Survey	 100%

### 13. Firm Size

Firm name	DOTD Job Classification	Number of personnel committed to this contract	Total number of personnel available in this DOTD Job Classification (if needed)
	Principal	1	2
	Surveyor	4	6
	Party Chief	4	7
	Rodman	6	9
	Technician	4	9

**14. Organizational Chart:**

**15. Minimum Personnel Requirements:**

Use the table below to identify both prime consultant and sub-consultant staff designated to work on this contract meeting the Minimum Personnel Requirements (MPRs) specified in the advertisement. Ensure the résumé reflects the required experience stated in the MPR. Make sure the P.E. discipline is also listed (highlighted in table) that is meeting the MPR; e.g. professional civil engineer should show the discipline of the license as civil if meeting that MPR.

MPR No. Do not insert wording from ad	Personnel being used to meet the MPR (Individual(s) may not satisfy more than one MPR unless specifically allowed by Attachment B of the advertisement)	Firm employed by	Type of license and discipline meeting MPR / certification & number (Ex: PE # - Civil)	State of license	License / certification expiration date
1	Bradley S. Holleman, PLS, PE		PLS 5082 - Land Survey/ PE 47165 - Civil	LA LA	9/30/2024 03/31/2025
2	Bradley S. Holleman, PLS, PE		PLS 5082 - Land Survey/ PE 47165 - Civil	LA LA	9/30/2024 03/31/2025
2	Ross Wilson, PLS		PLS 5148 - Land Survey	LA	03/31/2024

**16. Staff Experience:**

Firm employed by				
Name	<b>Russell "Joey" Coco, P.E., MBA</b>	Years of relevant experience with this employer	9	
Title	President/CEO	Years of relevant experience with other employer(s)	13	
Degree(s) / Years / Specialization		BSCE / 2000 / LSU    MBA / 2006 / LSU Coastal Engineering Certificate / 2008 / Old Dominion University		
Active registration number / state / expiration date		31337 / LA / 09/30/2024		
Year registered	2004	Discipline	Civil Engineering	
Contract role(s) / brief description of responsibilities		<b>QA/QC</b>		
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; i.e., “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the years of experience specified in the applicable MPR(s).			
06/23-08/23	<b>LA DOTD Underwater Acoustic Imaging - LA 14 Over Delcambre Canal Hydrographic Survey, Iberia Parish, LA</b> – Principal-in-Charge for the area around the LA-14 Bridge over Delcambre Canal. The work included typical cross-sections, and water bottom features below waterline were collected using multi-beam and single beam sonar equipment. Terrestrial LiDAR was used to capture the above water surface.			
05/22-10/22	<b>LA DOTD Underwater Acoustic Imaging, Statewide, LA</b> – Principal-in-Charge for aiding in the field acquisition of multibeam hydrographic survey data of 10 bridges in South Louisiana. The bridges locations ranged from Inner Harbor Navigation Canal in New Orleans to the Mississippi River in Baton Rouge. Data was then extracted from the multibeam data to provide depths at predetermined locations along the bridge and immediate area.			
06/17-02/19	<b>Amite River Basin Model- Hydrographic Survey - Livingston Parish, LA</b> - Principal-in-Charge to provide hydrographic surveying of the Amite River and Comite River. Tasks included typical cross-sections of these rivers, as well as detailed 3-D bathymetric data collected with sonar equipment, ground control for LIDAR of the Amite River Basin, and a high- resolution survey of the Amite River Diversion Weir utilizing a variety of techniques including multi-beam sonar and traditional survey methods.			
03/13-07/15	<b>H.004698 – Almonaster Avenue Lift Bridge, Orleans Parish, LA</b> - Principal-in-Charge responsible for overseeing the complete topographic and property surveys, developing a drainage map, and establishing existing right-of-way for North line of I-10.			
05/19-09/19	<b>H.000303.6-Danziger Bridge Rehabilitation - Orleans Parish, LA</b> - Principal overseeing survey investigation of Danziger Bridge. Included laser scanning and comparison of actual conditions to original plans.			
10/18 - 12/18	<b>LADOTD 4400010587- Sunshine Bridge Repair- St. James Parish, LA</b> - Principal overseeing topographic surveying and terrestrial LIDAR services for the LA DOTD Sunshine Bridge Emergency Repair project following the severe impact of a barge mounted crane with the lowest horizontal bridge chord.			
11/19 - 11/20	<b>LADOTD S.P. No. H.012083.5- Calcasieu River Bridge Investigation- Calcasieu Parish, LA</b> - Principal overseeing laser scanning services for the I-10/Lake Calcasieu bridge in Lake Charles, LA.			
5/17 - 10/17	<b>LADOTD S.P. No. H.013052- LA 442 Tangipahoa River Bridge Replacement- Tangipahoa Parish, LA</b> - Principal overseeing topographic surveying for the LA 442 bridge over the Tangipahoa River. The survey included numerous cross-section surveys upstream and downstream of the bridge, as well as the along the bridge fascia. The work was performed utilizing shallow, flat-bottomed boats as a result of the shallow and sandy river bottom and was provided to engineers for the purpose of hydraulic analysis and bridge preservation and replacement considerations.			

**16. Staff Experience:**

<b>Russell “Joey” Coco, P.E., MBA (CONT.)</b>	
08/19-1/20	<b>H.011670-I-10/Loyola Interchange Improvements - Kenner, LA</b> – Principal-in-Charge overseeing Topographic Survey, Right-of- Way Survey, and Drainage Survey. The project stretches from the levee in Kenner to the Williams Blvd. off ramp, as well as Loyola Avenue and portions of Veterans Blvd.
11/18-04/19	<b>H.011684.5-LA 327 Spur: Staring Lane Extension – East Baton Rouge Parish, LA</b> – Principal-in-Charge for comprehensive topographic surveying services and developing a drainage map for the Staring Lane Extension project for LA DOTD. Included in this work was a survey performed utilizing traditional methods and terrestrial laser scanning of roadway surfaces.
09/17-12/19	<b>S.P. No. H.011808.5- Palmetto Co. Canal Bridge - St. Landry Parish, LA</b> - Principal-in-Charge to provide property surveys, title take-offs, and right-of-way map services for the removal and replacement of a timber trestle bridge that spans Bayou Des Glaises, located along LA. Hwy. 10 in St. Landry Parish near the town of Palmetto, LA.
06/18-12/19	<b>LA 98: Roundabout at Mills St - Lafayette Parish, LA</b> – Principal-in-Charge for right of way surveys for this project that requires construction of new roundabout at the intersection of Mills Street and W. Gloria Switch Road (LA Hwy 98) in Lafayette Parish, Louisiana.
05/17-10/18	<b>H.004791.5-Belle Chasse Bridge and Tunnel Replacement Survey- Plaquemines Parish, LA-</b> Principal-in-charge for comprehensive topographic surveying services for the Belle Chasse Bridge and Tunnel Replacement project for LA DOTD. Included in this work was a survey performed utilizing traditional methods, terrestrial laser scanning of roadway surfaces, and multi-beam 3-D hydrographic surveying.
10/18-7/21	<b>East Baton Rouge Stormwater Masterplan - East Baton Rouge Parish, LA-</b> Principal-in-Charge for hydrographic surveying of bayous and creeks located within East Baton Rouge Parish for the EBR Stormwater Masterplan. The work consists of establishing cross-sections and stream bed profiles along their length.
02/17-03/18	<b>LA DOTD H.010753.5 – US 90 / I-310 Interchange – St. Charles Parish, LA</b> – Principal-in-Charge responsible for topographic surveying and 3-D laser scanning at the intersection of US90 and I-310 in St. Charles Parish. This project will allow improvements for safety and efficiency. The complete topographic survey includes all utilities with depths and all drainage required along with finish floor elevations of all buildings that fall within the survey limits.
08/14-Ongoing	<b>LA DOTD H.004273.5 – I-49 Connector – Lafayette Parish, LA</b> – Principal-in-Charge responsible for providing topographic surveying services for the I-49 Connector. The project is in a dense urban area and is approximately 5 miles long. Forte and Tablada, Inc. completed laser scanning services for much of the congested corridor as a means to obtaining topographic data without endangering surveyors.
05/13-Ongoing	<b>Old Hammond Highway – Segment 1- East Baton Rouge Parish, LA-</b> Principal-in-Charge for an environmental study and engineering services to design and construct a four-lane boulevard with a raised median and turn lanes and includes several roundabouts. The project will also include traffic signalizations, utility relocations, testing, lighting, landscaping, right-of-ways, and environmental mitigation. This project is part of the Green Light Plan.
05/17-Ongoing	<b>LA DOTD S.P. No. H. 009859.5- Load Rating of Bridges – Statewide, LA</b> – Served as a review engineer for load rating of statewide bridges.
01/10-12/12	<b>LA DOTD S.P. No. 450-10-0159- I-10: Siegen Lane to Highland Road Design Build ITR – East Baton Rouge Parish, LA</b> – Served as leader of Independent Technical Review of all bridge structures.

**16. Staff Experience:**

Firm employed by		<b>FORTE &amp; TABLADA</b>		
Name	<b>Bradley S. Holleman, P. E., P. L. S.</b>	Years of relevant experience with this employer	2.5	
Title	Senior Vice President, Survey/AMM	Years of relevant experience with other employer(s)	17	
Degree(s) / Years / Specialization		BSCE / 2009 / Civil Engineering; Minor in Land Surveying		
Active registration number / state / expiration date		5082 / LA PLS / 9/30/2024; 47165 / L A PE / 3/31/2025		
Year registered	2012 P.L.S.	Discipline	Land Surveying/Civil Engineering	
Contract role(s) / brief description of responsibilities		<b>Principal; Fulfills MPR No. 1 and 2</b>		
Experience dates (mm/yy-mm/yy)	Experience and qualifications relevant to the proposed contract; i.e., “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).			
05/23 – 07/23	<b>H.014266 – I-210: Auxiliary Lanes (Nelson to Ryan) Lake Charles, LA</b> – Principal providing property surveying services. The project consisted of producing a property survey containing the existing right of way and property lines along various segments of the I-210 in Lake Charles for the design of improvements to the corridor.			
06/22 - 09/23	<b>H.014416 - La 3125 @ La 3274 Roundabout, St. James Parish, LA</b> – Principal providing right-of-way mapping services. The project requires the construction of a roundabout located at La. Hwy 3125 at La. Hwy 3274 near the towns of Gramercy and Lutcher.			
03/22 - 10/22	<b>H.014560 - La 94: Vermilion River Bridge Replacement, Lafayette and St. Martin Parishes, LA</b> – Principal providing right-of-way mapping services. The project includes removal and replacement of an existing bridge over the Vermilion River at the borders of Lafayette Parish and St. Martin Parish on the current route of Hwy La 94.			
11/21 - 10/22	<b>H.012072 - LA 60: Drain Bridge, Washington Parish, LA</b> – Principal providing right-of-way mapping services. The project consists of removal of a bridge structure to be replaced by a box culvert, and is located along Hwy La 60 in Bogalusa.			
10/22 – 6/23	<b>H.014554 LA 3025 Coulee Mine Scour Repair, Lafayette Parish, LA</b> – Principal for the property survey and right of way mapping. The project consists of mapping the required construction servitudes for the repair of a scoured areas along a canal in Lafayette Parish near Structure 032808282300691. The work consisted of conducting field and office analysis to determine the existing right of way and produce a set of right of way maps, according to LA DOTD specifications, for acquisition of parcels required for construction.			
06/21 - Ongoing	<b>H.014219, H.014222, H.014231, H.0142636, H.014228 Rural Bridge Replacement Initiative Phase 2; 5 State Project Numbers (20 Structures), Districts 04 and 05, LA</b> – Principal for providing topographic surveys, property surveys and right of way mapping for 22 bridge locations in Louisiana.			
08/20 – 11/20	<b>H.004100 I-10 LA 415 to Essen Lane Property Survey, East Baton Rouge Parish, LA</b> – Surveyor-in-Charge for the property survey. This project was for the construction of Interstate 10 improvements from The Mississippi River to College Drive in East Baton Rouge Parish. The work consisted of conducting field and office analysis to determine the existing right of way and produce a set of right of way maps, according to LA DOTD specifications, for acquisition of parcels required for construction.			
12/19 - 11/20	<b>H.001344 US 190: LA 437 – US 190 (BUS)</b> – Surveyor-in-Charge for the property survey and right of way map. This project was for the construction of improvements along US 190 from La 437 to US 190 (BUS). The work consisted of conducting field and office analysis to determine the existing right of way and produce a set of right of way maps, according to LA DOTD specifications, for acquisition of parcels required for construction.			

**16. Staff Experience:**

<b>Bradley S. Holleman, P.E., P.L.S. (CONT.)</b>	
04/18 – 09/18	<b>H.010601 I-10: La 328 to La 347 - LA DOTD -South Louisiana Survey Retainer</b> – Surveyor-in-Charge for the property survey and right of way map. This project was for the construction of a improvements along Interstate 10 from LA 328 to La 347. The work consisted of conducting field and office analysis to determine the existing right of way and produce a set of right of way maps, according to LA DOTD specifications, for acquisition of parcels required for construction.
03/20 – 07/20	<b>H.012393 LA 98: Roundabout at Mills Street</b> – Surveyor-in-Charge for the property survey and right of way map. This project was for the construction of a roundabout at the intersection of LA 98 at Mills Street. The work consisted of conducting field and office analysis to determine the existing right of way and produce a set of right of way maps, according to LA DOTD specifications, for acquisition of parcels required for construction.
07/19– 01/20	<b>H.010909 LA 44: Widening and Roundabout</b> – Surveyor-in-Charge for the property survey and right of way map. This project was for the construction of a widening and roundabouts along La 44 in Ascension Parish. The work consisted of conducting field and office analysis to determine the existing right of way and produce a set of right of way maps, according to LA DOTD specifications, for acquisition of parcels required for construction.
03/19– 06/19	<b>H.001352 Comite River Diversion Bridge LA 19 - LA DOTD -South Louisiana Survey Retainer</b> –Surveyor-in-Charge for the property survey and right of way map. This project was for the construction of a Comite Diversion River in East Baton Rouge Parish. The work consisted of conducting field and office analysis to determine the existing right of way and produce a set of right of way maps, according to LA DOTD specifications, for acquisition of parcels required for construction.
01/19– 04/19	<b>H.001352 Comite River Diversion Bridge LA 67 - LA DOTD -South Louisiana Survey Retainer</b> – Surveyor-in-Charge for the property survey and right of way map. This project was for the construction of a Comite Diversion River in East Baton Rouge Parish. The work consisted of conducting field and office analysis to determine the existing right of way and produce a set of right of way maps, according to LA DOTD specifications, for acquisition of parcels required for construction.
11/16 – 05/17	<b>H.002980 I-10 Overpass over US 165 – LA DOTD -South Louisiana Survey Retainer</b> – Surveyor-in-Charge for the property survey and right of way map. This project was for the improvements to the I-10 US 165 interchange. The work consisted of conducting field and office analysis to determine the existing right of way and produce a set of right of way maps, according to LA DOTD specifications, for acquisition of parcels required for construction.
09/15 – 01/16	<b>H.011323 Nighthawk / Spanish Trail – LA DOTD -South Louisiana Survey Retainer</b> – Surveyor-in-Charge for the property survey and right of way map. This project was for the construction of a new railroad crossing connecting Nighthawk Road to Spanish Trail. The work consisted of conducting field and office analysis to determine the existing right of way and produce a set of right of way maps, according to LA DOTD specifications, for acquisition of parcels required for construction.
03/12– 11/12	<b>H.0023586 LA 16 at LA 22 Roundabout- Livingston Parish - LA DOTD -South Louisiana Survey Retainer</b> – Project Manager for the property survey and right of way map. This project was for the construction of a roundabout at the intersection of La 22 and La 16. The work consisted of conducting field and office analysis to determine the existing right of way and produce a set of right of way maps, according to LA DOTD specifications, for acquisition of parcels required for construction. <b>This is one of Mr. Holleman's projects that demonstrates his ability to fulfill the MPR of five (5) years of experience in responsible charge performing property surveys and preparing right of way maps.</b>
06/12– 10/12	<b>H.009978 Bayou L’Orse Bridge – LA DOTD -South Louisiana Survey Retainer</b> – Project Manager for the property survey and right of way map. This project was for a bridge replacement over Bayou L’Orse. The work consisted of conducting field and office analysis to determine the existing right of way and produce a set of right of way maps, according to LA DOTD specifications, for acquisition of parcels required for construction.

12/19 – 09/20	<b>H.011970- Bayou Terrebonne Bridges, Terrebonne Parish, LA</b> – Responsible for laser scanning the Bayou Terrebonne bridge along with the entire intersection and adjacent roads.				
11/18-04/19	<b>LA 327 Spur: Staring Lane Ext. Route LA 327-S, East Baton Rouge Parish, LA</b> – Responsible for laser scanning between the intersections of La 42 (Burbank Dr.) and Staring Ln. and La 327 (Gardere Ln.) and La 30. A complete Topographic survey including all utilities with depths and all drainage was required, along with finish floor elevations of all buildings that fall within the survey limits.				
05/17-10/18	<b>H.004791.5- Belle Chasse Bridge and Tunnel Replacement Hydrographic Survey, Plaquemines Parish, LA</b> – Responsible for laser scanning for the Belle Chase Bridge and Tunnel Replacement project for LA DOTD. Included in this work was a survey performed utilizing traditional methods, terrestrial laser scanning of roadway surfaces, and multi-beam 3-D hydrographic surveying.				
11/19 – 12/20	<b>H.012083- Calcasieu River Bridge Investigation, Calcasieu Parish, LA</b> – Laser scanning and project technician to provide laser scanning services for the I-10/Lake Calcasieu bridge in Lake Charles, LA. Terrestrial scans were done underneath the bridge for 10 spans on the East and West side, on top the deck to capture the superstructure, as well as from the water below to capture the sub structure. In addition to the terrestrial scans, mobile Lidar was done for future planning.				
02/17-03/18	<b>H.010753.5 – US 90 / I-310 Interchange, St. Charles Parish, LA</b> – Project Technician responsible for topographic surveying and 3-D laser scanning at the intersection of US90 and I-310 in St. Charles Parish. This project will allow improvements for safety and efficiency. The complete topographic survey includes all utilities with depths and all drainage required along with finish floor elevations of all buildings that fall within the survey limits.				

**16. Staff Experience:**

<b>Brent M. Campbell (CONT.)</b>	
8/14-Ongoing	<b>H.004273.5 -I-49 Connector, Lafayette Parish, LA</b> – Responsible for laser scanning services for the I-49 Connector. The project is in a dense urban area and is approximately 5 miles long. Forte and Tablada, Inc. completed laser scanning services for much of the congested corridor as a means to obtaining topographic data without endangering surveyors.
01/13-12/13	<b>H.009933 MacArthur Interchange Project Phase 1B, Orleans Parish, LA</b> – Responsible for laser scanning general areas in support of topographical survey including location and elevation surveys, for redundancy and volume.
01/13-03/13	<b>H.009250 I-10 (Highland to LA 73), East Baton Rouge and Ascension Parishes, LA</b> – Responsible for laser scanning of several bridges overpassing I-10, and extracting/coding survey coordinates and alignments. Also determined minimum horizontal and vertical clearances.
03/13-07/15	<b>H.004698 Almonaster Avenue Lift Bridge, Orleans Parish, LA</b> – Responsible for laser scanning of Almonaster lift bridge and determination of various bridge geometrics and counterweight volume based on scan data. Provided 2-D plan geometry and elevations, as well as coded survey data. Used scanning to perform rail survey for inaccessible areas.

## 16. Staff Experience:

Firm employed by				
Name	<b>Blake Bonnette</b>	Years of relevant experience with this employer	7.5	
Title	Senior Advanced Measurements and Modeling Technician	Years of relevant experience with other employer(s)	1.5	
Degree(s) / Years / Specialization		AS / 2015 / South Louisiana Community College		
Active registration number / state / expiration date		N/A		
Year registered	N/A	Discipline	N/A	
Contract role(s) / brief description of responsibilities		<b>Drone Technician and Pilot</b>		
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; i.e., “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the years of experience specified in the applicable MPR(s).			
07/22-Ongoing	<b>IWGO Bridge Rehabilitation, Orleans Parish, LA</b> – Conducted drone video and still photography for in-phase inspection during rehabilitation and painting of the Paris Rd bridge over the Intracoastal Waterway Gulf Outlet (IWGO), aka the “Green Bridge”. Forte & Tablada is conducting pre-planned flight paths using state-of-the-art UAV within 3m accuracy of the agreed-upon flight path, the collection of photos and videos throughout the project, and processing of content for final production use.			
05/19-09/19	<b>Danziger Bridge Rehabilitation, Orleans Parish, LA</b> – Laser scanning and project technician for survey investigation of Danziger Bridge. Included laser scanning and comparison of actual conditions to original plans.			
10/19-10/20	<b>Inspection of Metal Culverts, Statewide, LA</b> – Laser scanning technician to provide inspections and data acquisition for approximately 230 culvert locations statewide. Culvert measurements were acquired with a mixture of 3-D laser scanning, sonar, and LiDAR.			
01/16-02/18	<b>I-49 Connector, Lafayette, LA</b> – Laser scanning technician to develop the topographic survey of approximately 22 miles of roadway along this interstate to determine the existing conditions before finalizing the connection. Responsible for the data and leading the data extraction efforts using Faro Scene and MicroStation			
08/22-09/22	<b>Leonard Road Farm and Cupples Port Aerial Lidar, Shreveport, LA</b> – Project Technician responsible for performing aerial lidar on 700+ acres and processing the data to produce surfaces and calculate dirt fill amount to alleviate flooding.			
08/22-09/20	<b>Industrial Facility-Natchitoches, Natchitoches, LA</b> – Project technician responsible for performing aerial lidar and aerial photography on approximately 26.9 acres. Using aerial lidar, a DTM, and surface contours were created for the site. Ortho mosaics were created from aerial photography.			
02/20-12/22	<b>Gillis Long Center, Water, Fire, and Sewer, City, LA</b> – Project technician responsible for performing aerial photography to create ortho mosaics of site. Ortho mosaics were then used to extract topographic features within 25’ of existing water and sewer lines to aide with design.			
01/18-12/19	<b>Sunshine Bridge Emergency Repair, Donaldsonville, LA</b> – Worked with a design team to formulate a practical solution for attaining advanced measurements that were compatible with traditional measuring practices which were required for the structural analysis and repair design for the bridge. Responsibilities included creating a set of plans to document the damage on this bridge. These plans contained detailed information on structural strain and inconsistencies from original plans. Additionally, helped to scan for incremental bridge movement as well as monitoring bridge movement as LADOTD jacked on members to place new beams using Faro Scene and MicroStation.			

# SECTION 17

Forte and Tablada was selected by Louisiana Department of Transportation and Development to provide right of way and servitude mapping on an as needed basis until 2026. The contract involves contracting separate task orders for each project. Below is a list of the projects and project numbers for each of the task orders assigned to Forte and Tablada.

- H.011684 - La 327 Spur - (Ongoing)
- H.012072 - La 60 Drain Bridge - (Completed)
- H.014560 - La 94 Vermilion River Bridge - (Completed)
- H.014416 - La 3125 @ La 3274 Roundabout - (Completed)
- H.014560 - La 94 EWLA - (Completed)
- H.014554 - La 30225 Coulee Mine Scour Repair - (Completed)
- H.014266 - I-210 Nelson to Ryan Auxiliary Lanes - (Completed)
- H.013537 - La 93 Ditch Bridge - (Ongoing)
- H.012563 - La 73 Bayou Manchac Bridge - (Ongoing)
- H.004100 - I-10 La 415 to Essen Lane - (Ongoing)
- H.012068 - La 1026 Creek Bridge - (Ongoing)
- H.010116 - La 1088 Soutl and Trinity Roundabout - (Ongoing)
- H.012059 - La 19 Bridges Near Zachary - (Ongoing)
- H.003931 - I-10 Calcasieu Railroad - (Ongoing)
- H.011706 - BNSF Several Railroad Crossings - (Ongoing)

These task orders included one or more of the following services:

- Title Take off
- Property Survey
- 60% Base Right of Way Map
- Staking out parcels for real estate/owner negotiations
- Final Check Print
- Final Right of Way Map
- Parcel Descriptions for acquisition

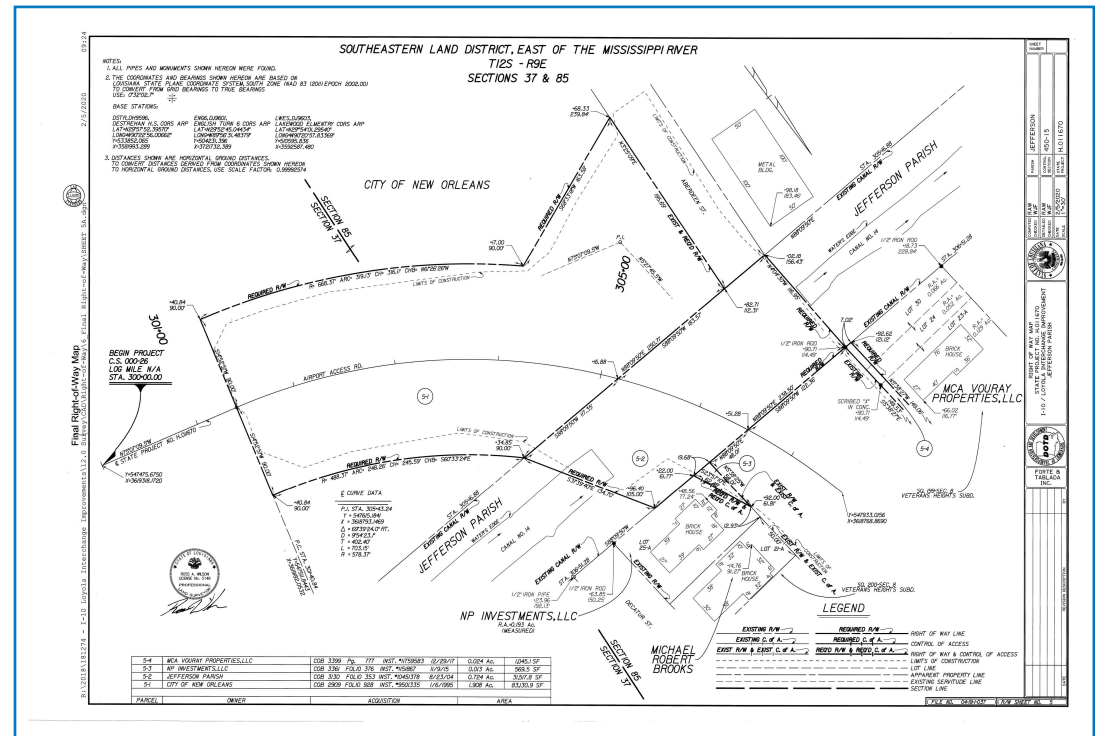

**Project Team:**  
**Joey Coco, Jr., P.E., Principal-in-Charge**  
 Brad Holleman, P.L.S., P.E., Surveyor-in-Charge  
 Ross Wilson, P.L.S., Project Surveyor

Forte and Tablada, Inc. is a subconsultant to Gilchrist Construction Company to provide topographic surveying and right-of-way mapping services for the I-10/Loyola Interchange Improvements. Right-of-way mapping services provided include performing title take-offs, field investigations to survey property boundary evidence, boundary analysis, existing right-of-way location determination and right of way mapping. Additional services include preparing exhibit maps for an act of transfer between the City of Kenner and the Airport for property along Aberdeen St and 27th St. so that a cooperative endeavor agreement can be reached between interested parties. All right-of-way maps were produced in accordance with state regulations and LA DOTD requirements as outlined in Addendum A of the Location and Survey Manual.

Forte and Tablada performed comprehensive engineering and land surveying services for the construction of a new four lane boulevard roadway from LA 16 to LA 1026 including several bridges.

Services provided for this project included, but were not limited to, property surveys, title takeoffs and right of way mapping. The right of way mapping was performed in accordance with the LA DOTD Right of Way Mapping standards.

**Project Team:**  
**Chad Bacas, P.E., Project Manager**  
**Allison Schilling, P.E., Project Engineer**  
**Kresten Brown, P.E., Project Engineer**  
**Mark Kessler, Senior Technician**  
**Joffrey Easley, P.E., Project Engineer**  
**Ross Wilson, P.L.S., Project Surveyor**  
**Jace Ricard, P.L.S., Project Surveyor**

# SECTION 18

## 18. Approach and Methodology:

Forte and Tablada personnel has experience in conducting property surveys with title takeoffs and right of way mapping for LA DOTD under an IDIQ contract. The approach and methodology presented below will review the capabilities, capacity, and experience of Forte and Tablada for performing the multiple phases of right of way mapping, specifically for LA DOTD. Since this contract is intended to cover many projects over multiple parishes, our intent is to showcase the steps and processes we will take for each task order rather than focus on one particular type of project (i.e. roundabout, widening, bridge, etc.)

Forte and Tablada understands its personnel is key to the successful completion of task orders under this IDIQ contract. Forte and Tablada has six (6) full time Professional Land Surveyors on staff, of which four (4) will have specific responsibilities under this IDIQ contract; Brad Holleman, PLS, Ross Wilson, PLS, Rachel Waldroup, PLS and Gerald (Jerry) Middleton, PLS. Brad, Ross, Rachel and Jerry have nearly 45 years of combined experience as Professional Land Surveyors and over 89 years of combined experience in the surveying industry. Forte and Tablada also has land surveying licenses in the states of Mississippi, Texas and Arkansas which allows Forte and Tablada to work on projects near state lines. Forte and Tablada has observed that having multiple, experienced land surveyors on staff aids in creating solutions for difficult conditions and performing quality control reviews of each stage of the right of way mapping process. Included within the Forte and Tablada team are also well trained technicians and field staff to assist in the successful completion of each task order.

The second area to consider is Forte and Tablada's surveying processes and equipment. Forte and Tablada has the most modern surveying technology including:

13 Survey Trucks

2 Survey Boats +  
Single Beam Sonar

1 Survey Boat +  
Multi-Beam Sonar

1 Mobile LiDAR

1 Marsh Master

1 Bathycat

10 Trimble  
Total Stations

13 Trimble  
GPS Receivers

3 FARO Laser  
Scanners

4 UAV (Drones)

1 Aerial  
LiDAR Unit

45 Survey Staff  
(5 Certified UAV Pilots)

## 18. Approach and Methodology:

However, Forte and Tablada recognizes that surveying equipment is only as accurate as the processes and procedures used during its use, therefore redundant observations, measurement verification, data post processing, and recognition of the limitations of each type of equipment is practiced.

The contracting process for right of way mapping IDIQ task orders is another area in which Forte and Tablada's personnel has experience. Our staff understands the level of effort required to complete right of way maps for LA DOTD which aids in the estimating and schedule development stage of the task order process.

The next four (4) sections of Forte and Tablada's approach and methodology for this contract will walk through each phase of a typical right of way map task order for LA DOTD; 1) Property Survey and Title Takeoff, 2) Base Right of Way Map, 3) Final Check Print Set, and 4) Final Right of Way Map.

### PROPERTY SURVEY

The Property Survey is the first phase of a right of way map. The intent of the property survey is to provide the design engineer a base Microstation file containing the existing right of way, apparent property lines, centerline alignment and other supporting information such as the land owner names, station/offset of existing right of way points of intersection and major improvements within 50 feet of the proposed required right of way lines. Forte and Tablada will begin this phase by performing a Title Takeoff should a Title Research Report not be complete at the commencement of the survey. The Title Takeoff will consist of researching existing right of way maps at LA DOTD and court house research into previous survey plats and deeds affected by the required right of way lines. The Title Takeoff will be compiled and submitted in the Property Survey Phase deliverable. Prior to the start of the field survey, Forte and Tablada will recover the existing survey control established at the time of the topographic survey to ensure the property survey is performed on the same coordinate system as the topographic survey and design.

The Title Research Report and/or Title Takeoff will be used to begin the recovery of evidence in the field such as property monuments, right of way monuments and lines of possession. The measurements performed in the field will be analyzed with the deed descriptions and previous survey plats to render an opinion by the Professional Land Surveyor as to the location of existing right of way and property lines. Often, this process is iterative between the office analysis and field recovery of evidence. Once the location of the existing right of way and property lines are set by the Professional Land Surveyor, the Property Survey Plat is drafted according to the procedures, style and QA/QC checklist set forth in the LA DOTD's Addendum "A" to the Location and Survey Manual Property Surveys and Right of Way Maps (Addendum A). The other required deliverables, such as the ASCII file listing coordinates and descriptions of all found monuments, PDF copy of all documents (plats, maps, etc.) used to determine property line locations, MicroStation DGN file of the Property Survey Plat and a PDF file of the Property Survey Plat are created, compiled with proper naming convention and submitted to the task manager via ProjectWise.

### BASE RIGHT OF WAY MAP

The commencement of the Base Right of Way map is triggered by the completion of the 60% Preliminary Construction set by the design engineer. Forte and Tablada will use the required right of way lines established by the design engineer to create taking parcels within privately owned areas. Forte and Tablada will constrain the station and offset values presented on the design plans to establish the location of the required right of way and compare the location to the provided design DGN. A 60% Base Right of Way map will then be drafted according to the procedures, style and QA/QC checklist set forth in the LA DOTD's Addendum "A". The right of way maps will be drafted utilizing CadConform in MicroStation to ensure proper line styles and text weights are in accordance with LA DOTD's standards. The 60% Base Right of Way map will be checked in CadConform and sealed for compliance to LA DOTD's electronic standards. Forte and Tablada strives to not get the same format comment twice,

## 18. Approach and Methodology:

therefore each reviewed set of previously submitted right of way maps are saved in a directory for future use in review and instruction of drafting personnel.

After submission of the 60% Base Right of Way map, a Joint Plan Review (JPR) meeting is held. The JPR meeting is a review of the Base Right of Way maps by Location Survey, Project Management, Real Estate, Utility Section, District personnel, the design engineer and Forte and Tablada. Clear and concise communication from the Professional Land Surveyor is critical during the JPR meeting. In order to communicate clearly, Forte and Tablada places georeferenced comments on the 60% Right of Way maps for items that are unable to be explained graphically. Some examples of comments placed on a base sets by Forte and Tablada personnel are land that is potentially been subdivided, discrepancies between the design plans and design DGN, potential issues of access to adjacent properties, deed description discrepancies and any other issues that warrant open discussion during the JPR meeting.

### FINAL CHECK PRINTS

Forte and Tablada will begin the Final Check Print set of the right of way maps after 60% Base Right of Way comments and the updated construction set is provided. At this phase of the task order, Forte and Tablada will address all comments from the previous submittal and complete the right of way map for final format review by Location and Survey. A preliminary parcel input file will be generated to review the accuracy of bearings, distances and areas throughout the right of way map. Another two step QA/QC review of the Final Check Prints will be performed prior to submitting to LA DOTD.

### FINAL RIGHT OF WAY MAP

The Final Right of Way map phase will begin after Final Check Print comments and update design plans are received. All comments will be address and a final review of the right of way maps will be checked for compliance to the design plans. Forte and Tablada will create a final parcel input file utilizing the code sequencing established the DOTD program CogoWin. The parcel input file will be reviewed to ensure the generated metes and bounds descriptions, used by the Real Estate section to acquire the parcels, are in full agreement with the right of way map down to the hundredth of foot in distance and to the second in bearing. Forte and Tablada will submit all required deliverables including;

- 1) Final Right of Way map, signed, sealed and dated by the Professional Land Surveyor, on 4mil mylar utilizing a laser printer
- 2) Microstation DGN file of the Right of Way map,
- 3) PDF copy of the Final Right of Way map in the proper naming convention
- 4) PDF copy of each required Full Title Research Report with the proper naming convention and parcel numbers added to the cover sheet and,
- 5) the final parcel input file with the proper naming convention.

## 18. Approach and Methodology:

### TASK ORDER SCHEDULE

Progress Schedule Bar Charts are used to track the schedule of each task order issued under this IDIQ contract. An updated bar chart will be provided at each milestone submittal (Property Survey, 60% Base Map set, Final Check Print and Final Map set) and each invoice. The bar chart tracks the ratio of percent complete to time elapsed in order for the task manager to track schedule adherence. Each phase of the task order will have a number of days in which Forte and Tablada will complete a milestone deliverable. The schedule for each phase of a right of way map task order will not be consecutive since design iterations will take place between each phase. Forte and Tablada understands the importance of project schedules and will go above and beyond to meet project time lines.

### CONCLUSION

In closing, Forte and Tablada will strive to provide the Department with the highest quality surveying services and contract management for each task order issued under this IDIQ contract. While we are unable to outline the specific approach and methodology for a particular project within this section, we hope the paragraphs above display our prior experience with similar contracts and our eagerness to provide right of way mapping services to the Louisiana Department of Transportation and Development.

**20. Certifications/ Licenses**

If the advertisement requires submission of licenses and/or certificates, include them here. Otherwise, leave this section blank.

**21. QA/QC Plan and/or Work Plan:**

If the advertisement requires submission of a QA/QC plan or Work plan, include them here. Otherwise, leave this section blank. If a QA/QC plan is included in this section and was not required by the advertisement, it will be redacted.

**22. Sub-consultant information:**

If one or more sub-consultants will be used, provide the name, address, point of contact and phone number for each. Otherwise, leave this section blank.

Firm Name (Name must match as registered with Louisiana's Secretary of State)	Address	Point of Contact and email address	Phone Number
N/A	N/A	N/A	N/A

### 23. Location:

If location is an evaluation criterion for this advertisement and the prime consultant intends to establish a local presence, describe the plan for doing so. Otherwise, leave this section blank. Any information included in this section will be redacted if not required by the advertisement.
